

Formula for calculating your GPA from numerical marks:

Calculate your cumulative GPA (CGPA) as a percentage as follows:

$$\text{CGPA} = \frac{\sum_{\text{All courses}} \text{Marks obtained for course}}{\sum_{\text{All courses}} \text{Maximum possible marks for course}} \times 100\%$$

Note:

- 1) Ignore courses that have a letter grade or 'Pass' grade (e.g. Physical Education)
- 2) The CGPA needs to be expressed as a percentage (e.g. 82.8%)
